## **Professor Daniel E. Morse is Inducted as Fellow of the Materials Research Society**

Daniel E. Morse, Professor of Molecular Genetics and Biochemistry at University of California, Santa Barbara, was inducted as Fellow of the Materials Research Society (MRS) at the 2013 MRS Spring Meeting in San Francisco. This recognition honors MRS members who are notable for their distinguished accomplishments and their outstanding contributions to the advancement of materials research, worldwide.

Professor Morse was recognized for his seminal contributions to understanding the molecular mechanisms of biomineralization; development of novel bioinspired routes to kinetically controlled, low-temperature synthesis of nanostructured inorganic materials.
