The University of California, Santa Barbara Institute for Collaborative Biotechnologies (ICB) is a uniquely interdisciplinary research environment, with a mission of transforming biological inspiration into technological innovation. The ICB SABRE program in Science and Engineering at UCSB brings science and engineering majors from across the U.S. to UCSB for a summer research experience. Interns are partnered with a mentor of similar interest, conduct research in our state-of-the-art laboratories, attend research seminars, receive training in career development skills, and participate in social activities.

ELIGIBILITY REQUIREMENTS:
This is a competitive research program and is open to any science or engineering undergraduate or masters student. Student must be enrolled as a junior, senior or masters student in fall 2010.

PROGRAM HIGHLIGHTS:
• 10-week Summer Research experience  
• $4000 Stipend  
• Up to $500 for travel  
• Housing and Meals provided
